

WestState
— PRECAST INDUSTRIES —

COMPANY PROFILE

Precast and on-site concrete Built for WA.

Prestressed floor slabs, tilt panels, footings and donuts, road barriers and slip form for builders and civil projects across Perth and regional WA.

Built on Experience.

Built for WA.

WestState Precast Industries manufactures and supplies precast concrete products for projects throughout Western Australia. From our Maddington facility, we produce pretensioned floor slabs, pad and donut footings, road barriers and custom precast products. We also provide on-site concrete services, including tilt-up panel casting and slipform construction.

Locally owned and operated, we bring practical construction experience and a clear understanding of what matters on site. Our focus is on quality products manufactured to project drawings and engineering specifications, supported by clear communication, reliable service and delivery that keeps your project moving.

01

Floor slabs

Engineered prestressed concrete floor slabs for transportable and modular buildings, manufactured to your project drawings and specifications

Slabs up to
16m × 4.5m

02

On-site tilt-up panels

Concrete tilt-up panels cast and erected on site to suit your building's design and structural requirements

03

Footings and donuts

Precast pad and donut footings manufactured at our Maddington facility, available for collection or delivery to your site

04

Concrete barriers

Precast concrete barriers for roadworks, construction sites and car parks, manufactured to specified project requirements

05

Slipform concrete

On-site slipform concrete construction, delivering continuous concrete profiles to suit your project's design and specifications

06

Custom precast

Custom precast concrete products made to order, with sizes, shapes and cast-in details tailored to your project.

Why work with us

Engineered for your project

Products manufactured and checked against project drawings and engineering specifications, with careful attention to accuracy and quality

Tested for strength

Concrete is tested in our on-site laboratory, with the required strength verified before products are released for lifting and handling.

Clear quotes

Written quotations clearly outline the scope, inclusions and pricing, with amounts shown both excluding and including GST.

Yard and site capability

Precast manufacturing at our Maddington facility, complemented by on-site tilt-up panel casting and slipform concrete services.

Systems guided by ISO

Our quality, environmental and safety management systems are structured around the principles of ISO 9001, ISO 14001 and ISO 45001.

Flexible delivery and collection

Delivery coordinated for standard and oversized loads, with collection also available from our Maddington facility to suit your project schedule.

How it works

1	2	3	4	5
Tell us about your project	Receive a clear quote	Confirm your order	We cast, cure and test	Delivery, collection or installation
Send us your plans, dimensions and requirements, or visit our team to discuss what you need.	We'll provide a written quote outlining the scope of work and pricing, with GST clearly shown.	Accept your quote and make the agreed payment so we can schedule your work.	We manufacture in our yard or on your site, completing the required testing and quality checks before release.	Your finished products are delivered, collected or installed on site, as agreed in your quote.

At a glance

In our yard	Floor slabs, footings and donuts, road barriers plus custom items
On your site	Tilt panels, slip form and custom items
